## **FuelOnly Recipient of the 2009 State Farm Service-Learning Champion Award**

FuelOnly, recently received the **2009 State Farm Service-Learning Champion Award** in recognition for its role as an advocate and benefactor of the Evergreen Public School District Biodiesel Project.

With roots in the environmentally conscious Northwest, FuelOnly created the opportunity to match its experience in the petroleum industry with the need for specialized research and development of alternative fuels. As an established leading voice in the quality control of the developing international biodiesel community, the company learned of the Biodiesel research being conducted by the students within Evergreen School District in Washington. The Evergreen School District Biodiesel project was progressing into a fully integrated production to application coursework. FuelOnly attended presentations by the students involved in this service-learning coursework and was impressed by the strides they had taken to use the waste cook-oil from the school district and converting it into an alternative fuel being actively used for vehicle application. The research team and the chemists of FuelOnly donated their time with the students to bring the newest of biodiesel development to their project. The FuelOnly mission of bettering the global community advanced in its own back yard as it was able to donate thousands of dollars in quality control laboratory biodiesel testing to the students as they developed their product. Not satisfied with this, FuelOnly donated a trailer for their portable biodiesel production technology and then used its connections within the Biodiesel community to supply the Evergreen School District with additional needed equipment to increase their production efficiency.

### **About the State Farm® Service-Learning Champion Award**

State Farm supports service-learning as a teaching method that enhances the academic achievement of students while engaging in service to the community. This award recognizes the valuable role played by a non-traditional advocate of service-learning such as a community member, business leader, or public official. Service-Learning Champions support school-based service-learning by their actions, add personal expertise to service-learning initiatives, and encourage others to join in service-learning activities.

### **About FuelOnly, Inc.**

FuelOnly is an industry leading fuel analysis, testing and research laboratory. The company specializes in providing ONLY high quality fuel analysis and testing services to commercial and industrial businesses. By focusing on fuel analysis and testing services, the company is able to provide superior quality analysis, a high degree of personalized customer service, and sample turn-around times far superior to other fluids testing laboratories.

FuelOnly focuses a significant amount of its activity on research for improving advanced technology, compression ignition engine efficiency, meeting emissions standards and bio-fuel development. FuelOnly is an industry leader, looked to by government agencies, production facilities and small producers alike for innovative, scientific answers.
